

Problem

Given a string containing lowercase English letters, find and print all the characters that occur more than once. You must use bit manipulation to track the characters that have already appeared.

Submissions

Input Format

The first line contains a string S

Constraints

1 ≤ |S| ≤ 10⁵ S contains only lowercase English letters (a-z)

Output Format

Print all duplicate characters in the order of their first repeated occurrence. If there are no duplicates, print No duplicates.

Language Python 3

```
1 s = input().strip()
2
3 seen = 0
4 printed = 0
5 result = []
6
7 for ch in s:
8     pos = ord(ch) - ord('a')
9     mask = 1 << pos
10
11     if seen & mask:
12         if not (printed & mask):
13             result.append(ch)
14             printed |= mask
15     else:
16         seen |= mask
17
18 if result:
19     print(*result)
20 else:
21     print("No duplicates")
```
