

Problem

Given two sorted arrays, merge them and find the median of the

Submissions

combined sorted array.

Input

Format

First line contains two integers n and m.

Leaderboard

Second line contains n sorted integers.

Third line contains m sorted integers.

Discussions

Constraints

$1 \leq n, m \leq 10^5$
 $-10^6 \leq \text{array elements} \leq 10^6$

Output

Format

Print the median of the merged array.

If the total number of elements is odd, print the middle element. If even, print the average of the two middle elements

Language

Python 3

```
1 n, m = map(int, input().split())
2 arr1 = list(map(int, input().split()))
3 arr2 = list(map(int, input().split()))
4
5 combined = sorted(arr1 + arr2)
6 total = n + m
7
8 median = combined[total // 2] if total % 2 != 0 else (combined[total // 2 - 1]
9 print(f"{float(median):.1f}" if total % 2 == 0 else float(median))
10
```
